## GREENER BY DESIGN

# 21<sup>ST</sup> CENTURY GARAGES

### WELCOME TO THE 21<sup>ST</sup> CENTURY SECTIONAL GARAGE DESIGN

OUR PRODUCTS ARE NOW SPECIFIED BY LOCAL  
AUTHORITIES, HOUSING ASSOCIATIONS, THE MoD,  
NETWORK RAIL, THE CONSTRUCTION INDUSTRY  
AND RENEWABLE ENERGY MARKETS.

We've developed a synthetic concrete product (TPR®),  
made from mixed plastic waste diverted from landfill.  
TPR® is significantly stronger than concrete and it is  
used to make our sectional garage walling system.

## TPR<sup>®</sup> SYNTHETIC CONCRETE GARAGES

- ✓ Various colours and bespoke sizes
- ✓ Fire retardant and rot resistant
- ✓ Significantly stronger than concrete
- ✓ 50+ years life expectancy
- ✓ Graffiti easily removed

TPR<sup>®</sup> synthetic concrete manufactured using inert minerals and mixed plastic products that have been diverted from landfill... stronger than concrete yet 40% lighter. Call us now on 01792 581197 for advice and a free survey/quotation.

Visit: [www.tpr-garages.com](http://www.tpr-garages.com)

Our structures are manufactured from a non-cementitious, synthetic concrete which has been developed in the UK with support from Cardiff University and the Carbon Trust.

Utilising redundant plastics from external works programmes including windows, doors and rainwater goods, 'Closed Loop Recycling' can be achieved. Your mixed plastics can be reprocessed into new TPR<sup>®</sup> products, enhancing your Corporate Social Responsibility (CSR) credentials and benefiting the environment by reducing landfill. Every reason why the incredible TPR<sup>®</sup> garages are the right choice for your business, also offering zero maintenance with a 50+ year life expectancy.

All of our structural buildings have a high quality gel coat external finish which gives a very robust, easy clean solution with a modern and attractive appearance to your garages.

We offer a contrasting range of colours and our in-house design team can develop a scheme from concept to manufacture and finally erection.
