

2018 NHMF Awards Shortlisted: Best customer impact

Reducing residents' heating and hot water bills

Fred Tibble Court is an Extra Care Retirement Housing Scheme consisting of 31 flats which are occupied by some of Hanover's most vulnerable residents. Hanover installed the first UK retrofit of the Aqua Quinta system which is a new state of the art technology. It combines the Quinta Pro high-efficiency condensing boiler with the Eco Plus passive flue gas heat recovery unit and a hot water cylinder to create a super condensing solution providing high volume delivery of hot water. The project has reduced residents heating and hot water bills while delivering higher quantities of hot water.

Judges' comment

This project has provided many benefits for both the client and customers. It tackles energy efficiency and health. An excellent project that can be easily adopted across the sector.
