IoT Solutions Group

Using data to focus action

The right data

In the right format

To the right people

Sooner rather than later

Innovative tech should NOT be...

Complicated
to use

Time-consuming
to install

Costly
to run

Subject: ASC Early Response

Hi Emma,

The following residents have had status changes:

- Clarence Bobblethwaite was **RED**, and in the last 4 hours has changed

Sent on behalf of IoT Solutions Group Ltd

Real-life implications

Vulnerable resident monitoring

- 30% of vulnerable residents likely to be experiencing fuel poverty (Winter 21-22)
- Some residents didn't know how to use their heating effectively

“Simple, well planned, preventative action could help avoid over 28,000 deaths each year as a result of living in cold homes.”

**National Institute for Health
and Care Excellence**
