

Carbon Footprints

11/10/2021

Agenda

- Why are carbon footprints useful?
- What should be included in a carbon footprint?
- How can we compare our organisations carbon footprint?

Why are carbon footprints useful?

- Measure the challenge
- Create meaningful and effective strategies
- Celebrate success

What should be included in your carbon footprint?

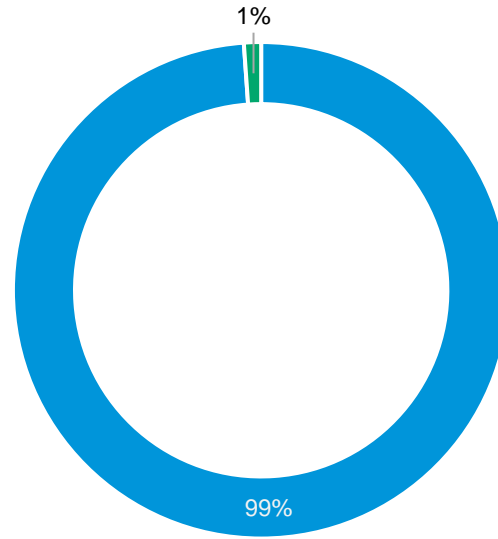

- Existing homes
- Corporate activities
- New homes (forecast)
- Supply chain

Carbon Footprint

Carbon Footprint

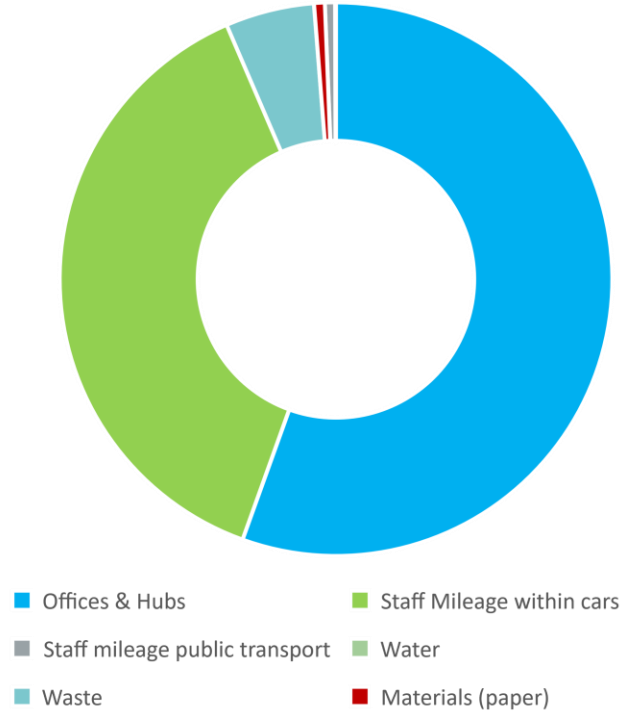

- Existing Stock
- Corporate Activities

Corporate carbon footprint

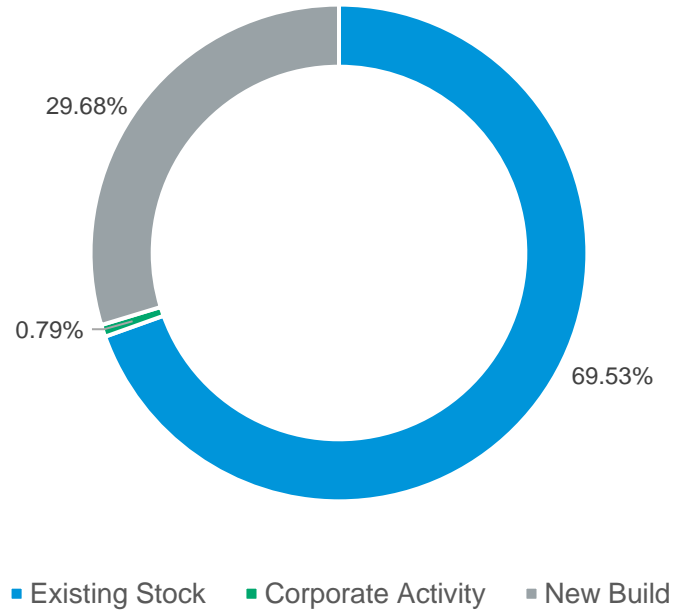

Corporate Carbon Footprint

New build

Carbon Footprint Including New Build to 2050

Supply chain

- Impact of supply chain
- DLO vs supply chain

Intensity metrics

- Synchronise with other reporting scheme metrics
